

## IN THE CLAIMS

The following is a complete listing of the claims in this application, reflects all changes currently being made to the claims, and replaces all earlier versions and all earlier listings of the claims:

1. (Currently Amended) A system for executing a cash payment from a computer network, the system comprising:

~~a payor computing device for transmitting a payment request over the computer network to a P2P server, the~~ a P2P server operative to receive [[the]] a payment request ~~transmitted over the computer network by a payor computing device~~ and debit a financial instrument specified by a user of the payor computing device, the payor computing device and the P2P server communicating according to a native format of the P2P server; and

request translation software operative to receive the payment request and translate the request into the native format of an ATM control server, the ATM control server being operative to generate and transmit payment instructions and a PIN code to an ATM, thereby enabling an to enable the ATM to dispense the payment upon receipt of the PIN code.

2 and 3. (Cancelled).

4. (Original) The system of claim 1 wherein the request translation software is operative to translate the payment request into multiple native formats of a plurality of disparate ATM control servers.

5. (Cancelled).

6. (Currently Amended) The system of claim 1 wherein the ATM control server is operative to receive a response generated by the ATM ~~generates and transmits a response~~ indicating that [[it]] the ATM has received the payment instructions.

7. (Original) The system of claim 6 wherein the request translation software is operative to receive a response from the ATM control server that the ATM has received the payment instructions, to convert the response into a format that is native to that utilized by the P2P sever, and transmit the response to the P2P server.

8. (Original) The system of claim 7 wherein the request translation software translates the response into a format that is native to that utilized by the P2P server.

9. (Original) The system of claim 7 wherein the P2P sever transmits the response to a payee computing device.

10. (Original) The system of claim 9 wherein the response from the ATM control server comprises the PIN code.

11. (Original) The system of claim 10 wherein the PIN code is transmitted to the payor computing device.

12. (Original) The system of claim 11 wherein the ATM dispenses an amount specified by the payment instructions in response to the PIN code.

13. (Currently Amended) A method for executing a cash payment via a computer network, the method comprising the steps of:

~~transmitting~~ receiving, by a P2P server, a payment request from a payor computing device over the computer network ~~to a P2P server, the P2P server operative to receive and process;~~

processing the payment request by debiting a financial instrument specified by [[the]] a user of the payor computing device, wherein the payor computing

device and the P2P server are in communication according to a native format of the P2P server;

~~executing receiving, by request translation software, to receive~~ the payment request and ~~translate translating~~ the request into a native format of an ATM control server, ~~the ATM control server operative to; and~~

~~generate generating, by the ATM control server, payment instructions and transmit transmitting the payment instructions and a PIN code to an ATM; and~~

~~sending payment instructions to an ATM.~~

14 and 15. (Cancelled).

16. (Currently Amended) The method of claim 13 further comprising the step of translating the payment request into the native format of one of multiple native formats of a plurality of disparate ATM control servers.

17. (Cancelled).

18. (Currently Amended) The method of claim 13 further comprising the step of receiving, by the ATM control server, a response generated by ~~generating and~~

~~transmitting a response at the ATM~~ indicating that the payment instructions have been received.

19. (Currently Amended) The method of claim 18 further comprising the steps of:

receiving a response at the ATM control server from the ATM that the payment instructions have been received;

converting the response into a format that is native to that utilized by the P2P server; and

transmitting the response to the P2P server.

20. (Currently Amended) The method of claim 19 further comprising the step of translating the request into a format that is native to that utilized by the P2P server by the request translation software.

21. (Currently Amended) The method of claim 19 further comprising the step of transmitting the response to a payee computing device.

22. (Currently Amended) The method of claim 21 further comprising the step of including the PIN code in the response from the ATM control server.

23. (Currently Amended) The method of claim 22 further comprising the step of transmitting the PIN code to the payor computing device.

24. (Currently Amended) The method of claim 23 further comprising the step of the ATM dispensing an amount specified by the payment instructions in response to the PIN code.

25. (Cancelled).
